APPLICATIONS

6-12-6 + SOLU-CAL with Aqua-Ca and INTENSIFY Soil Microbial BioCatalyst

A Four-Stage Powerhouse Fueled by Nature
Maximizes available water & nutrients for better turf establishment

- 1) Calcium for nutrient availability**
Makes stored and applied nutrients more available to plant and soil
- 2) Starter Fertilizer Nutrients**
Ensures seedling development and increases turf vigor
- 3) Aqua-Ca Water Management Technology**
Promotes more efficient use of irrigation water and rain water
- 4) INTENSIFY Soil Microbial BioCatalyst**
Delivers beneficial bacteria and fungi to reduce nutrient requirements

Soil Microbial BioCatalyst

6-12-6 + SOLU-CAL with Aqua-Ca^{Ca} and *INTENSIFY* Soil Microbial BioCatalyst

6-12-6 + Solu-Cal with Aqua-Ca and INTENSIFY Soil Microbial BioCatalyst is a special formulation of starter fertilizer & soluble Calcium, complexed with Aqua-Ca multifunctional infiltration and hydration soil surfactant, plus INTENSIFY Soil Microbial BioCatalyst. The complete product delivers the following benefits:

- **Solu-Cal supplies essential soluble Calcium to the soil for proper pH adjustment**
- **Provides an ideal source of essential N-P-K Starter Fertilizer nutrients**
- **Multi-directional infiltration & hydration soil surfactant increases soil moisture movement & retention on the soil surface and in the root zone**
- **Probiotic delivers a wide range of beneficial bacteria and fungi to reduce nutrient requirements**
- **Promotes nutrient availability & efficiency**
- **Enhances beneficial microbial activity**

6-12-6 + Solu-Cal with Aqua-Ca and INTENSIFY Soil Microbial BioCatalyst may be applied to a wide variety of turf grasses, including newly seeded areas and existing turf. SOLU-CAL 6-12-6 PLUS may be soil incorporated at planting time, or side or top dressed when turf is growing.

Available in Coarse Grade (210 SGN), 50lb bags.

Application Rates

FOR NEWLY SEEDED & SODDED AREAS: Coverage 10 000 sq ft.
Apply 5 lbs per 1000 sq. ft or 220 lbs per acre at time of seeding.
For best results, re-apply 4-6 weeks after initial application at the same rate.

FOR EXISTING TURF: SOLU-CAL 6-12-6 can be used to properly maintain nutrients levels at the same rates as for new seeding. To assure complete and even coverage apply at half rates in two directions. Apply to dry turf.
