Calcium & Activated Humic Acid for Maximum Nutrient Availability

Solu-Cal PLUS with Detonation® Biocatalyst is a unique formulation of soluble Calcium and Organic Humic Acids, complexed with Detonation® Biocatalyst. Solu-Cal Calcitic Lime Enhanced with Activated Humic Acid supplies essential soluble Calcium and Carbon to the soil. This makes stored & applied nutrients more available to the plant and soil. The addition of Activated Humic Acid has been shown to increase nutrient uptake.

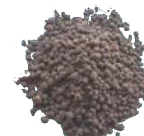

Solu-Cal PLUS with Detonation® Biocatalyst may be applied to a wide variety of turf grasses, including newly seeded areas and existing turf. Solu-Cal PLUS with Detonation® Biocatalyst may be soil incorporated at planting time, or side or top dressed when turf is growing. **Application Rates**

- TO RAISE LOW SOIL pH, apply 12.5 lbs. per 1,000 sq.ft. or 520 lbs. per acre. Up to 3 applications per year, applied 8 weeks apart, are recommended for low pH soils. 50lb bag covers 4,000 sq.ft.
- TO MAINTAIN SOIL pH, apply 6 lbs. per 1,000 sq.ft. or 260 lbs. per acre. Two applications per year are recommended. 50lb bag covers 8,000 sq.ft.
- TO MAINTAIN CALCIUM LEVELS in the soil for optimum growing conditions, apply 5 lbs per 1,000 sq.ft. Two applications in spring & fall are recommended. 50lb bag covers 10,000 sq.ft.

Probiotics to Release Nutrient Reserves & Build Natural Defenses

Detonation® Biocatalyst stimulates beneficial microbial activity in the soil to promote nutrient efficiency. Increased soil microbial populations help reduce nutrient requirements. With a slow nutrient release, Detonation® Biocatalyst promotes strong, healthy growth that can better tolerate stress. Detonation® helps to build increased resistance to environmental stress (heat, cold, drought, foot traffic) and boosts natural defenses against disease and insect problems.

Wolf Trax® DDP Iron for Better Nutrient Distribution

Wolf Trax® DDP Iron ensures more consistent distribution of iron particles across every acre. This precise balance of Iron supports healthy green up with no surge in growth. Wolf Trax® DDP Iron includes multiple forms of active iron for immediate availability and uptake, as well as continuous feeding over time.

Available in Coarse Grade (210 SGN), 50lb bags.
