

THE NATURAL CHOICE

Solu-Cal with
Cavalcade® .37%
Preemergence Herbicide

**Defend your turf
with Cavalcade.**

One application supplies essential soil and plant calcium from *Solu-Cal* while combatting both grassy and broadleaf weeds.

Make Cavalcade®.37% your weed control weapon of choice this spring. It's the double-duty preemergence herbicide that prevents grassy weeds like crabgrass, *Poa annua* and goosegrass, as well as broadleaf weeds like prostrate spurge, common purslane and knotweed. With the proven active ingredient prodiamine, Cavalcade battles 30 weeds in all. Available as a granular combined with Solu-Cal. Staining is not an issue. One application supplies Solu-Cal enhanced calcium and Cavalcade.

Solu-Cal USA

Trusted prodiamine chemistry prevents both grassy and broadleaf weeds.

Cavalcade .37% Preemergence Herbicide contains the active ingredient prodiamine, the most robust of the dinitroaniline (DNA) herbicides. This quality herbicide provides preemergence control of 30 grassy and broadleaf weeds.

Advantages

- Supplies Solu-Cal enhanced calcium to soil and plants
- Long-residual preemergence control of grassy weeds such as crabgrass, *Poa annua* and goosegrass as well as broadleaf weeds like prostrate spurge, common purslane and knotweed – controls 30 weeds in all
- Can be applied in fall for weed prevention the following spring
- Highly effective weed control in both cool- and warm-season turfgrasses as well as ornamentals
- Labeled for use on all types of turfgrass sites including residential and commercial lawns, sports fields, golf courses (except putting greens) and sod farms
- Registered for use on ornamentals (container, field and landscape grown, including Christmas tree farms), rights-of-way, grounds of utilities and ungrazed fence rows

Usage

- Residential and commercial lawns
- Sports fields
- Sod farms
- Golf courses (except putting greens)
- Container, field and landscape grown ornamentals, including Christmas tree farms
