

Replace Liquid Lime with SOLU-CAL L

SOLU-CAL L

6-0-0 8% Ca Liquid

Calcium Complex with 6.0% PHCA

Improves soil structure, stimulates root and leaf development, regulates soil pH, strengthen cell walls, promote better germination and stand development

- Clear brown liquid with no grit or sediment as found in liquid lime
- Adjusts pH more efficiently than liquid lime
- Will significantly increase stand density and seedling vigor
- Use in hydroseeders or spray program
- Contains Carboxy organic acid PHCA to increase nutrient availability and stimulate roots
- **Contains 6.0% PHCA Organic Acid as compared to Nutri-Cal***

Application Rate

Turf Grasses: As Calcium supplement and soil pH ameliorant, apply 7 to 14 oz./M every 14-28 days. Use 14 oz./M when soil pH is below 5.8.

Hydroseeding: For hydroseeding applications as pH adjuster and seed germination enhancer, apply 14 oz./M in 100 gal. or 5 gallons/acre. Use this rate when specification calls for 10 gallons/acre of liquid lime.

Lime/ACRE Recommendation	Lime/1,000 sq. ft. Recommendation	Solu-cal L Equivalent/ACRE	Solu-cal L Equivalent/1,000 sq. ft.
500 lbs./acre	11 lbs./M	2.5 gallons/acre	7 oz./M
1,000 lbs./acre	23 lbs./M	5 gallons/acre	14 oz./M
2,000 lbs./acre	46 lbs./M	10 gallons/acre	28 oz./M

AVAILABLE IN SIZES

2x2.5 Gal. Cases (24 per pallet) • 55 Gallon Drum (4 per pallet)
275 Gallon Mini-Bulk (1 per pallet)
