

Solu-Cal products  
contain **pH:Ca**  technology

# **SOLU-CAL S**

## **Enhanced Gypsum**

**21% Calcium • 16% Sulfur**

### Uses

- Sodium and Salt abatement
- Aerating high CEC (heavy) soils
- Reducing soil bicarbonate
- Increases water penetration
- Contains university recommended source for Calcium Sulfate, Dihydrate Mined Gypsum
- Provides both Soluble Calcium and Sulfate Sulfur to soil
- In most soils, Solu-Cal S does not affect soil pH while adding soluble and available Ca
- Impregnated with 2% PHCA Organic Humic Acid to significantly increase nutrient availability and efficiency
- More finely ground to pass 325 mesh (before pelletizing)
- Dihydrate Gypsum 80% soluble in water - significantly more soluble than synthetic products with only 23% solubility
- 50 lb bag covers 4,000 sq.ft. to 8,000 sq.ft.; 555 lbs/acre to 260 lbs/acre
- Smaller particle sizing; coarse grade 210 sgn, greens grade 110 sgn, dust-free formula

**AVAILABLE IN 50 LB. BAGS and 2,000 LB. BULK BAGS**

#### **Guaranteed Analysis**

Calcium (Ca) .....	21.00%
Sulfur (S) .....	16.00%

Derived from Mined Gypsum.  
Also contains 2.00% PHCA and  
4.00% Lignin Sulfonate  
(water soluble binder)
